HELPFUL INFORMATION

STITCH GAUGE—*Important*—Knitted articles are planned on the basis of working to a specified number of stitches and rows to 1 inch; this is referred to as the GAUGE. Required gauge is given at beginning of instructions. If this gauge is not obtained the finished article will not be the correct size. The size needles recommended will give the average worker the correct gauge. However, if you do not obtain the gauge required, change the size needles to conform to the tension of your individual work; if your work is too loose use smaller size needles to tighten gauge; if your work is too tight use larger size needles to loosen gauge. You MUST get gauge given to insure proper size of finished article.
